

IOOF Multi-Manager Investments

MANAGER PROFILE

Manager:	Boutique Manager Portfolio
Fund range:	IOOF MultiMix
Asset class:	Australian Shares
Style:	Diversified Australian Shares

The Boutique Manager Portfolio consists of two specialist managers that are early in their life and growth cycle and include:

BioScience Managers

Is part of the Phillip Capital Group and is a specialist manager investing exclusively in mid-stage Bioscience companies in Australia and the Asian region. BioScience Managers adopt a private equity-like approach to investing in the bioscience space. This approach has proven well suited to the potentially long holding periods and relative illiquidity of investments in this space. The private equity approach also suits their proactive engagement with management of the companies their funds hold.

Selector Funds Management

Was founded in 2003. Selector initially managed an All Cap Portfolio which has performed well over its nine year history. In mid-2012 Selector developed a second, Ex-50, portfolio, with a focus on the mid cap space, investing in stocks with strong and growing business franchise's which are trading on attractive valuations. Selector typically does not hold junior resources, start-ups, or property trusts. The portfolio essentially comprises high quality mid cap stocks. Portfolio turnover has historically been very low. The Selector investment process is clearly defined and is repeatable, at its core is a reliance on frequent company contact and analysis to assess longer term earnings growth potential.
